NES TECHNIFLATE®

Suitable in all markets for composite tooling, movement control, sealing and leak testing

- Patented 'membrane' joining for wrap-around sealing on rotating shafts
- Diverse material range - USP, low out-gassing viton, silicone FDA and more
- Non-standard and standard options
- Ideally suited to applications with variable sealing surfaces
- Utilising NES' market leading in-house extrusion and vulcanising capabilities
- Compressor and pressure control devices also available
